For 2016, product sales were \$19.3 billion in the United States, \$6.1 billion in Europe, \$2.5 billion in Japan and \$2.1 billion in other locations. For 2015, product sales were \$21.2 billion in the United States, \$7.2 billion in Europe, \$1.9 billion in Japan and \$1.9 billion in other locations.

Antiviral Product Sales

Antiviral product sales, which include sales of our HIV and other antiviral products and our chronic hepatitis C (HCV) products, were \$6.6 billion for the fourth quarter of 2016, compared to \$7.9 billion for the same period in 2015. For 2016, antiviral product sales were \$27.7 billion, compared to \$30.2 billion in 2015.

- HIV and other antiviral product sales for the fourth quarter of 2016 were \$3.4 billion, compared to \$3.0 billion for the same period in 2015 and \$12.9 billion for the full year 2016, compared to \$11.1 billion in 2015. The increases were primarily due to the continued uptake of our tenofovir alafenamide (TAF)-based products, Genvoya® (elvitegravir 150 mg/cobicistat 150 mg/emtricitabine 200 mg/tenofovir alafenamide 10 mg), Descovy® (emtricitabine 200 mg/tenofovir alafenamide 25 mg) and Odefsey® (emtricitabine 200 mg/rilpivirine 25 mg/tenofovir alafenamide 25 mg), partially offset by decreases in sales of tenofovir disoproxil fumarate (TDF)-based products.
- HCV product sales, which consist of Harvoni[®] (ledipasvir 90 mg/sofosbuvir 400 mg), Sovaldi[®] (sofosbuvir 400 mg) and Epclusa[®] (sofosbuvir 400 mg/velpatasvir 100 mg), were \$3.2 billion for the fourth quarter of 2016, compared to \$4.9 billion for the same period in 2015 and \$14.8 billion for the full year 2016, compared to \$19.1 billion in 2015. The declines were due to lower sales of Harvoni and Sovaldi, partially offset by sales of Epclusa, which was launched in 2016 across various locations.

Other Product Sales

Other product sales, which include Letairis® (ambrisentan), Ranexa® (ranolazine) and AmBisome® (amphotericin B for liposome injection), were \$621 million for the fourth quarter of 2016, compared to \$523 million for the same period in 2015. For 2016, other product sales were \$2.2 billion, compared to \$1.9 billion in 2015.

For 2016 compared to 2015:

- R&D expenses and non-GAAP R&D expenses* increased primarily due to the overall progression of Gilead's clinical studies, including ongoing milestone payments, and Gilead's purchase of a U.S. Food and Drug Administration (FDA) priority review voucher.

- SG&A expenses and non-GAAP SG&A expenses* decreased primarily due to lower branded prescription drug fee expense, partially offset by higher costs to support Gilead's product launches and the geographic expansion of its business.

Corporate Highlights

• Announced the promotion of James R. Meyers to Executive Vice President, Worldwide Commercial Operations, in November 2016.

Product & Pipeline Updates announced by Gilead during the Fourth Quarter of 2016 include:

Antiviral and Liver Diseases Programs

• Announced that FDA and Japanese Ministry of Health, Labour and Welfare approved Vemlidy[®] (tenofovir alafenamide) 25mg, a once-daily treatment for adults with chronic hepatitis B virus (HBV) infection with compensated liver disease. Additionally, the Committee for Medicinal Products for Human Use, the scientific

committee of the European Medicines Agency, adopted a positive opinion on Gilead's Marketing Authorization Application for Vemlidy.

- Announced the submission of a New Drug Application (NDA) to FDA for an investigational, once-daily single-tablet regimen containing sofosbuvir 400 mg, velpatasvir 100 mg, and voxilaprevir 100 mg for the treatment of direct-acting antiviral (DAA)-experienced HCV-infected patients. The data submitted in the NDA support the use of the regimen for 12 weeks in DAA-experienced patients with genotype 1 to 6 HCV infection without cirrhosis or with compensated cirrhosis.
- Announced positive results from an open-label Phase 2 trial evaluating the investigational apoptosis signal-regulating kinase 1 inhibitor selonsertib (formerly GS-4997) alone or in combination with the monoclonal antibody simtuzumab in patients with nonalcoholic steatohepatitis and moderate to severe liver fibrosis (fibrosis stages F2 or F3). The data demonstrate regression in fibrosis that was, in parallel, associated with reductions in other measures of liver injury in patients treated with selonsertib for 24 weeks. These data were presented in a late-breaking abstract session at the Liver Meeting® 2016.
- Announced positive two-year (96-week) data from a Phase 3 study and 48-week data from two Phase 3b studies evaluating the safety and efficacy of switching virologically suppressed HIV-1-infected patients from regimens containing Truvada® (emtricitabine 200 mg/tenofovir disoproxil fumarate 300 mg) to regimens containing Descovy®. Results demonstrated regimens containing Descovy to be statistically non-inferior to regimens containing Truvada, with improvements in certain renal and bone laboratory parameters among patients receiving Descovy-based regimens.

Forward-looking Statements

Statements included in this press release that are not historical in nature are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Gilead cautions readers that forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially. These risks and uncertainties include: Gilead's ability to achieve its anticipated full year 2017 financial results; Gilead's ability to sustain growth in

revenues for its antiviral and other programs; the risk that estimates of patients with HCV or anticipated patient demand may not be accurate; the risk that private and public payers may be reluctant to provide, or continue to provide, coverage or reimbursement for new products, including Epclusa, Harvoni, Genvoya, Odefsey, Descovy and Vemlidy; the potential for increased pricing pressure and contracting pressure as well as decreased volume and market share from additional competitive HCV launches; austerity measures in European countries and Japan that may increase the amount of discount required on Gilead's products; an increase in discounts, chargebacks and rebates due to ongoing contracts and future negotiations with commercial and government payers; a larger than anticipated shift in payer mix to more highly discounted payer segments and geographic regions and decreases in treatment duration; availability of funding for state AIDS Drug Assistance Programs (ADAPs) and Veterans Administration (VA); continued fluctuations in ADAP and VA purchases driven by federal and state grant cycles which may not mirror patient demand and may cause fluctuations in Gilead's earnings; market share and price erosion caused by the introduction of generic versions of Viread and Truvada outside the United States, an uncertain global macroeconomic environment; and potential amendments to the Affordable Care Act or other government action that could have the effect of lowering prices or reducing the number of insured patients; the possibility of unfavorable results from clinical trials involving investigational compounds; Gilead's ability to initiate clinical trials in its currently anticipated timeframes; the levels of inventory held by wholesalers and retailers which may cause fluctuations in Gilead's earnings; Gilead's ability to submit new drug applications for new product candidates in the timelines currently anticipated; Gilead's ability to receive regulatory approvals in a timely manner or at all, for new and current products, including its single-tablet regimen containing sofosbuvir, velpatasvir and voxilaprevir; Gilead's ability to successfully commercialize its products, including Epclusa, Harvoni, Genvoya, Odefsey, Descovy and Vemlidy; the risk that physicians and patients may not see advantages of these products over other therapies and may therefore be reluctant to prescribe the products; Gilead's ability to successfully develop its oncology, inflammation, cardiovascular and respiratory programs; safety and efficacy data from clinical studies may not warrant further development of Gilead's product candidates, including selonsertib; Gilead's ability to pay dividends or complete its share repurchase program due to changes in its stock price, corporate or other market conditions; fluctuations in the foreign exchange rate of the U.S. dollar that may cause an unfavorable foreign currency exchange impact on Gilead's future revenues and pre-tax earnings; and other risks identified from time to time in Gilead's reports filed with the U.S. Securities and Exchange Commission (SEC). In addition, Gilead makes estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures. Gilead bases its estimates on historical experience and on various other market specific and other relevant assumptions that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ significantly from these estimates. You are urged to consider statements that include the words may, will, would, could, should, might, believes, estimates, projects, potential, expects, plans, anticipates, intends, continues, forecast, designed, goal, or the negative of those words or other comparable words to be uncertain and forward-looking.
